

PanOptic Capture for Panagon Content Services

PRODUCT OVERVIEW:

PanOptic Capture for Panagon™ provides a flexible alternative for capturing and indexing information into FileNet's Content Services document repository. The PanOptic application can be utilized at all volumes of document processing.

PanOptic Capture for Panagon was designed to meet the following objectives:

- Address the document capture needs of low-to-high volume environments of all industries.
- Capture and index can occur on the same station or separate workstations. Indexing is available in dedicated or concurrent licensing.
- Automate capture tasks using separator pages, fixed pages, manual indexing and tear-off. Using these features *significantly lowers data entry costs = lower operational costs.*
- Designed using industry-standard Microsoft® development platforms. *Lowering the total cost of ownership.*
- *Minimal administration support* and end-user training is required with this friendly application.
- Improve indexing accuracy by utilizing

data supplied by your existing database applications for information verification. Existing databases might include Microsoft SQL Server™ based client or accounting applications.

- Using Crystal Reports®, you are able to monitor productivity within the Capture and Index modules.

Feature List Includes:

- Seamless integration with FileNet's Content Services
- Centralized or decentralized indexing
- Unlimited document volume
- Simple application for administration and end-users
- Affordable & customizable
- Batch processing filter preferences

Current Department & Applications include:

- Accounting,
- Finance,
- Human resources,
- Engineering,
- Contracts,
- Correspondence,
- Explanation of benefits,
- Health and medical forms,
- Customer service departments,
- Bill of ladings,
- Delivery receipts,
- Client file applications,
- Signature cards,
- Order processing, etc.

MINIMUM REQUIREMENTS

- Pentium II
- 50MB disk space
- 128 MB RAM

- ISIS or TWAIN Scanner Capability

RECOMMENDED REQUIREMENTS

- Pentium III or higher
- 50 MB disk space
- 256 MB RAM
- Microsoft Windows 2000 SP2
- TCP/IP Protocol

SOFTWARE

- Microsoft Windows 98®
- Microsoft Windows 2000®
- Windows NT 4.0 with SP6
- Microsoft SQL Server 7.0 SP4
- Microsoft Windows XP
- TCP/IP Protocol

Customer References:

- Town of Fishers, Indiana
- Perrigo Pharmaceuticals, Michigan
