

PanOptic for SQL

To compete in today's business climate, organizations need to increase productivity and minimize expenses. You need the best help available. ***You need efficient document management solutions.***

PanOptic allows organizations to scan, store and retrieve business critical documents within seconds. A centralized document repository ***promotes efficient decision-making*** by providing access to necessary information 24/7. This access improves efficiency and productivity by reducing misfiling, document retrieval time and photocopying expenses.

The system allows for an ***unlimited number of users and an unlimited number of documents stored.*** Thus facilitating regulatory compliance issues that most financial, healthcare, government and other organizations are facing. PanOptic protects your critical documents and provide a means of disaster recovery.

Integration with existing applications is completed with ease due to PanOptic's open architecture and compliance with industry standards.

System Benefits:

- **Regulatory Compliance**
- **Storage Space**
- **Retrieval Time and Cost**
- **Information Security**
- **Disaster Recovery**
- **Customer Service Response**
- **File Distribution**
- **Scalable: Workgroup, or Enterprise Level**
- **Integrate & Leverage Existing Applications**

The total cost of ownership is reduced by utilizing existing hardware and software resources. ***Training is minimized*** using scan wizards and intuitive end-user interfacing. ***Support and maintenance is simplified*** for Administrators.
