

# PanOptic Web Subscription Services

- **Low Cost Imaging**
- **Only Your Internet  
Browser needed**
- **Specifically Designed for  
County Governments**

# No Capital Purchase, only an affordable monthly fee...

PanOptic Web Subscription Services is a complete document imaging system for your county records. Document Imaging is a way to organize all of your filing cabinets, by scanning the paper files into a storage repository according to document type and index values you determine. Records are then searched using an Internet connection from your desktop. You may type in the exact same search criteria that is used today when you walk up to a filing cabinet to look for a file. The search is complete in 3-8 seconds, without having to move from your desk. PanOptic hosts the application from our secure location, thus giving you an instant disaster recovery plan. You have no cost for the application, only a low monthly subscription fee, shared throughout any participating county office.

## **Document Imaging with:**

- **No Capital Purchase**
- **No Administrator Cost**
